Automated Bacterial Identification System

**PRINCIPLE**

Miniaturized identification method based on 29-30 biochemical/enzymatic tests

**ADVANTAGES**

Able to identify 500 types of bacteria up to species level*

Short turnaround time (4-5 days including preliminary identification)

Accurate results based on statistical use of specially designed tests and an exclusive database derived from clinical, food & environmental strains of bacteria

Test code: 21BACI-B038

Bacterial Identification (To Species Level)

Notes:

- Charges for identification are based on number of bacterial strains, not number of specimens. (as one specimen may contain several bacteria)

- Please check if the suspected bacterium is identifiable by the Automated Bacteria ID System test using our online tool.

* you may check if your bacterial sample can be identified by the Automated Bacteria ID System by using our online tool:
